Dear Colleagues and Friends:

WELCOME TO THE BIG APPLE!

The Dermatologic Society of Greater New York welcomes you to the 103rd Atlantic Dermatological Conference (ADC 2026) in New York, NY.

In keeping with tradition, the Committee has organized a case-based conference with three days of interactive educational and scientific sessions, product theaters, exhibits, and posters.

Networking opportunities are available during the Welcome Reception to be held in the Exhibit Hall. We encourage you to take the opportunity to visit each exhibitor over the next couple of days, as their support is valuable to this meeting, our practices, and our profession. Visit the ADC Exhibit Hall to discover new and emerging dermatological products, technologies and services.

The hallmark of ADC, our Live Patient Education Session, will be held on Saturday, May 2 on the 5th floor of the New York Hilton Midtown (8:00 am – 11:00 am). This will be followed by our keynote luncheon with Brian Cashman, General Manager of the New York Yankees, and an afternoon of case discussions led by an expert panel.

We hope you'll join us for a unique reception on Saturday evening at SPYSCAPE, an immersive experience featuring interactive spy challenges designed to reveal your hidden strengths in the heart of NYC.

We look forward to your participation during ADC 2026 and thank you for your continued support! If you have any thoughts or questions throughout the weekend, please feel free to email, post on social media, and visit the ADC Staff at the registration desk.

Sincerely,

Roger Ho, MD, MS, MPH

CONFERENCE EVALUATIONS

Please complete the overall conference evaluation form at the conclusion of the meeting. Your feedback helps us improve future Atlantic Derm conferences and is important for our educational planning and accreditation reporting.

The evaluation link will be sent to all attendees after the conference.

SCHEDULE & FACULTY

The 2026 Atlantic Dermatological Conference brings together the world's foremost experts to provide dermatologists with the most up-to-date guidelines, techniques, and clinical advances for diagnosing and treating skin disorders. Scientific sessions on a variety of topics will be held on Friday and Sunday with the highly anticipated Live Patient Viewing on Saturday.

STATEMENT OF NEED

Significant advances have occurred in the diagnosis and treatment of dermatological conditions. Practitioners in the field need educational opportunities to gain knowledge of recent findings and newly accepted standards related to diagnostic techniques and treatment options. By providing up to date information on the latest advances in diagnostics, therapies, and pathogenesis by those who specialize in the field, our goal is to facilitate best practices and improve current provider practices.

LEARNING OBJECTIVES

At the conclusion of this CME activity, learners should be able to discuss clinical presentation and pathophysiology of dermatologic conditions; discuss the diagnosis and treatment of the conditions covered; and discuss general clinical advances in the field of dermatology and issues specific to practitioners in the field.

LIVE PATIENT VIEWING

Saturday, May 2, 2026 • 8:00 AM – 11:00 AM
New York Hilton Midtown, 5th Floor
1335 Avenue of the Americas
New York, NY 10019

Live Patient Viewing remains a cornerstone of ADC. This year's session features a highly curated set of classic and rare dermatologic conditions, with a strong emphasis on genodermatoses and systemic disease.

Expect high-yield teaching cases that reinforce morphologic recognition, clinical patterns, and real-world management of conditions most dermatologists rarely encounter in routine practice.

The afternoon panel will distill key teaching points from each case, with expert commentary from dermatology and dermatopathology faculty.

After the completion of this session, attendees will gain new insight into diagnosis, treatment, and evaluation of challenging dermatology patients.
